

# Hunter SMART™

## Active Smartphone Headset

- Communication radio outlet (3.5mm).
- Seal pad protected Micro-USB charging outlet and charging status indication light.
- Retractable and adjustable microphone with wind noise reduction.

### Hunter SMART™

*Hunter SMART™ has active hearing protection with a communication radio and mobile phone connection. Perfect for modern hunters and professionals using the headset during work.*

The hear through sound is neutral and comfortable with the option to amplify. Volume can be adjusted individually for both the right and left ear.

The smartphone connection is controlled on the headset and the phone can be in a backpack or pocket. On the headset you can control answer/hang-up, play/pause of streaming content as well as connect/disconnect.

The retractable microphone has wind noise reduction for clear speech quality, a useful feature in windy conditions.

The communication radio has the highest priority and is always heard, even with discharged batteries. During a telephone call, music streaming and active hearing mode the communication radio is heard.

The smartphone connection has low energy technology and together with 3 AAA batteries it gives an astonishing +50 hours of continuous music streaming.

Rechargeable Ni-MH batteries can be charged directly in the headset through a standard mobile phone charger.

### Benefits

- +50h music streaming on one set of batteries
- The communication radio is always heard. Also during telephone calls, music streaming, hear through and with discharged batteries.
- Retractable microphone
- Microphone with wind noise reduction
- Built in rechargeable circuit for Ni-MH batteries
- Amplifies the hear through sound
- Individually adjustable for right / left ear
- Available with headband, neckband and for hard hat
- Patent pending on key technology
